Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1 and 6 recite "light being emitted from the hybrid material film side". It is unclear which side of the device is intended to be recited, because the hybrid film has multiple sides.

Clarification and/or correction are required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueda et al. (US 5,958,609). Ueda et al. discloses in Example 4 an organic EL device comprising a glass substrate, an ITO film (the anode), a film comprising a polysilane according to Synthesis Example 2, light emitting layer, electron transporting layer, and a cathode (see col. 22, lines 9-25). The polysilane material includes an organic portion and an inorganic portion (the silicon), which read upon the instant hybrid material film. Ueda et al. fails to teach the film includes inorganic particles per the instant claim 4 limitation of "not more than 30% by weight of inorganic particles".

Allowable Subject Matter

5. Claims 2, 3, and 5-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. The closest prior art is considered to be Ueda et al. (US 5,958,609) discussed above. Ueda et al. does teach a polysilane layer upon the anode, but fails to teach a silane with the specific groups of claims 2 and 3. Ueda et al. further fails to teach or to render obvious a hybrid film as thick as the layer recited in claim 5. Ueda et al. does not teach a multi-layered film according to claims 6-9.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is (571)272-1523. The examiner can normally be reached Monday through Friday.
